

Contour Cut

How to find a gap X & Y between Blade and Laser:

Contour cut is a function of WinPCSIGN and only work with Redsail, Saga, Teneth Expert LX, APD and Graphtec.

5 Copy the obtained value from Dx & Dy screen and paste to Micro Adjust:

Micro adjustment

X: -850 Y: 880

Test

Do not forget - (minus) if you got it

(Dx,Dy) ↓

(-850,880)

6 Click **next step** , to go to second printed corner. Use the arrow to move the laser over the second (2) corner. Press Next... and repeat same operation for last corner (3):
